Mousetrapper®

NumPad

Get faster with numbers. A numeric keypad makes your work easier if you deal with numbers, whether you're working on calculations, financial or accounting services, or just need a general calculator. NumPad is wireless and the perfect complement to Mousetrapper's Type Mini or Alpha. It's also convenient to use NumPad with a laptop.

Benefits of NumPad

With its compact design, a wireless NumPad gives you a numeric keypad that meets all your needs. Once you get used to having one, it's hard to do without. Work more efficiently with a NumPad!

If your current keyboard lacks a numeric keypad, the NumPad is the perfect complement. If you work on a laptop, you no longer need to carry a full-size keyboard—NumPad is enough to handle your numbers. With the foldable support legs, you can easily adjust the height at both the front and back to find your ideal hand position.

NumPad can be connected wirelessly via a 2.4 GHz dongle and can be placed on either the right or left side of your keyboard. Made from recycled plastic.
