

Advance 2.0 & Armrest

Advance 2.0 is our top seller and an ergonomic mouse alternative that prevents repetitive strain injury and other problems that may arise when working with a traditional mouse. Together with an armrest that relieves the shoulders and neck, you get a complete setup that both prevents pain and improves your efficiency.

Key features Advance 2.0

- » Slim ergonomic design
- » Control pad with click and scroll functions
- » 6 programmable buttons that can easily be customized using MT Keys at www.mousetrapper.com/software
- » Replaceable wrist supports
- » Height adjustment with folding non-slip surface
- » 2000 dpi

Key features Armrest

- » Smart ergonomic design
- » Developed to relieve neck, shoulders, back and forearms
- » The shape creates a natural centered working position
- » The narrowest part, the “waist”, is only 40 mm deep
- » Made of black artificial leather
- » Easy to keep clean with surface disinfectant
- » Z-shaped brackets that make it fit most desks. The desktop should not be thicker than 40 mm.
